

**SECTION IV  
MINIMUM MEASURE 4  
CONSTRUCTION SITE  
STORMWATER RUNOFF CONTROL**

# SECTION IV (MINIMUM MEASURE 4) CONSTRUCTION SITE STORMWATER RUNOFF CONTROL

## **1. Fact Sheet on Construction Site Stormwater Runoff Control**

In Year 3, a Fact sheet will be developed on construction site stormwater runoff controls. The following issues will be addressed in the Fact Sheet:

- Overview of Phase II Stormwater Regulations as it pertains to Construction Site Stormwater Runoff
- SPDES Permit for Construction- Related Activities
- SWPP Requirements for Sites One Acre or greater
- Site Assessments and Inspections

## **2. Establishment of Local Law for Construction Sites**

In Year 3, the Town will start developing local law relative to the following:

- Development of Local Law for Construction Site Stormwater Runoff Controls for sites under one acre and its impact on current Land Use Regulations and Wetlands Regulations
- Development of Local Law for Construction Site Stormwater Runoff Controls for sites one acre or greater and its impact on current Land Use Regulations and Wetlands Regulations
- Submission of plans for sites under one acre
- Development of procedures for receiving and reviewing information from the public of submission of plans for Construction Sites
- Development of procedures for reviewing Storm Water Pollution Prevention Plans (SWPPPs) for sites one acre or greater
- Development of procedures for Site Inspections and Enforcement for compliance with SWPPPs

## **3. Education and Training of Construction Site Operators**

In Year 3, the Town will develop a program to educate and train Construction Site Operators on:

- Overview of Phase II Stormwater Regulations as it pertains to Construction Site Stormwater Runoff
- SPDES Permit for Construction- Related Activities
- SWPP Requirements for Sites One Acre or greater
- Site Assessments and Inspections
